How to play sudoku

Every picture appears exactly once in each row, in each column and in each thick box.

Row

Each animal once

Column

Each animal once

Box

Each animal once

Try it!

Which animal goes in the square with the question mark? Look at the row, the column and the thick box: which animal is still missing?

Draw the picture in the empty square – or write its first letter (e.g. R for rabbit).

Answer: the rabbit 🐰

Tips for grown-ups

1. Start small: the puzzles get harder page by page. Begin with the 4×4 puzzles at the front, name the pictures together first – and use a pencil.
2. Ask, don't tell: "Which picture is still missing in this row?" helps more than the answer. Children who don't like drawing can write first letters or numbers.
3. Keep it short: one or two puzzles at a time are plenty. After each puzzle your child may colour in a star; the solutions are at the back of the book.
